June 7, 2017

Dear Bev,

We are writing to make you aware of a recent development in Clyde River's municipal restructuring process. At a meeting earlier this week, the Clyde River Municipal Council passed a motion to withdraw from the West River communities' municipal management growth study. After considerable discussion and deliberation the Council believes the community's needs are better met by participating in a process that includes a larger number and wider range of municipalities.

We recognize that there have been costs incurred in the West River communities process and are willing to reimburse the group for Clyde River's share of these costs. Our administrator, Bruce Brine, will be in contact through email to follow up on this.

Clyde River Council extends their thanks to the community of Afton for its initiative and leadership in this process. Council also wishes all participants in the West River communities well in their municipal restructuring pursuits.

Regards,

Municipal Council of Clyde River
